General Dentistry Informed Consent

By initialing and signing this form it is understood that ENGLISH is the language that I understand and communicate with.

(initials)_____

A. ANESTHESIA, MEDICATIONS AND DRUGS:
I acknowledge and understand that antibiotics, analgesics (pain killers), and other medications may cause adverse reactions, some of which are, but are not limited to, redness, pain, itching, swelling, dizziness, vomiting, cardiac arrest, miscarriage.

(initials)_____

I acknowledge and understand that medications, drugs and anesthetics may cause drowsiness and lack of coordination, which can be increased by the use of alcohol and/or other drugs. I have been advised by Dr. Nawabi not to consume alcohol, nor operate any vehicles or hazardous devices while taking medications and or drugs, or until recover fully from their effects. This may include a period of at least 24-48 hours after my release form surgery.

(initials)_____

I acknowledge and understand that occasionally, upon injections of a local anesthetic, I may have prolonged, persistent anesthesia, numbness and or irritations to the area of injection. The numbness may resolve over time or may persist indefinitely.

(initials)_____

I acknowledge and understand that if I elect to use Nitrous Oxide, "Zanax", "Atarax", Chloryl Hydrate, "Ativan" or any other sedative or recreational drugs, possible risks include, but are not limited to, loss of consciousness, obstruction of airway, anaphylactic shock, cardiac arrest and even death. I understand that someone needs to drive me home from the dental office after I have received sedation. I also understand that someone needs to watch me closely for a period of 10-12 hours, following my appointment, to observe for possible deleterious side effects, such as obstruction of airway.

(initials)_____

B. PERIODONTICS AND DENTAL HYGIENE (LOSS OF BONE AND TISSUE):
I acknowledge and understand that the long term success of treatment and the status of my oral condition depend on my efforts at proper oral hygiene (that is brushing and flossing) and maintaining regular recall dental visits.

(initials)_____

Periodontitis/Periodontics – I acknowledge and understand that I have a serious condition, causing gum and bone inflammation and/or loss, and that this condition can lead to the loss of my teeth and other complications. The treatment plans that are available have been explained to me which include, but are not limited to, gum surgery, replacements and/or extractions. Although these treatments have a high success rate I do understand that they cannot be guaranteed. I also understand that in some instances the treated teeth may require extractions.

(initials)_____

C. EXTRACTIONS/REMOVAL OF TEETH:
I acknowledge and understand that the purpose of the procedure and surgery is to treat and possibly correct my diseased oral tissues. Dr. Nawabi has advised me that if this condition persists without treatment or surgery, my present oral condition will probably worsen and deteriorate over time.

The potential risks may include, but are not limited to, the following:

1. Injury to adjacent teeth, fillings, or caps which may require the re-cementation of crowns, replacement of fillings, fabrication of crowns or extraction. Injury to other tissues not within the described surgical areal can also occur.
2. Trismus (limited opening; stiffness of facial and or neck muscles); changes in bite; or jaw joint (TMJ) – TemporoMandibular Joint) difficulty which may require physical therapy and or Surgery.
3. Post-operative discomfort; swelling; prolonged bleeding; tooth sensitivity to hot or cold; gum shrinkage possibly exposing existing/remaining crown margins; tooth looseness; delayed healing; dry-socket and or infection which may require prescriptions or additional treatment such as surgery.

4. Residual root and tooth fragments or bone spicules left behind when complete removal would require additional, extensive surgery or needless surgical complications.
5. Opening of the sinus, a normal cavity (air space) located above the upper teeth that may require additional surgery.
6. . Possible bone and or Jaw fracture(s) that may require wiring or surgical treatment.
7. Injury to the nerve underlying the teeth resulting in itching, numbness, or burning of chin, lip, gums, cheek, teeth and or tongue on the operated side; this may persist for several weeks, months, or in rare cases permanently.

(initials)_____

I give my informed consent for the doctor and staff to perform the treatment/surgery/procedure previously explained to me, or other procedures deemed necessary or advisable as necessary to complete the planned operation.
If any unforeseen conditions should arise in the course of the surgery/operation, calling for the doctor's judgment or for procedures in addition to or different from those now contemplated, I request and authorize Dr. Nawabi and staff to do whatever he may deem advisable, including referral to another dentist or specialist. I also understand that the cost of this referral would be my responsibility.

(initials)_____

RESTORABILITY OPTIONS INFORMED CONCENT (if applicable):
I have been advised by Dr. Nawabi and staff that the following tooth/teeth:

_____

_____ may be saved by root canal treatment and/or post-build up and crown(s) or by other restorations (fillings), but I elect to have the above mentioned tooth/teeth extracted, and do not wish to restore the tooth/teeth. The risks, benefits, and alternatives to treatment have been discussed with me and explained to me by my doctor (Dr. Nawabi), and I consent to the extraction of the above mentioned tooth/teeth.

D. **Fillings:**
I have been advised of the need for fillings, either silver or composite (plastic), to replace tooth structure lost to trauma or decay. I understand that with time fillings need to be replaced due to wear of material, in cases where very little tooth structure remains, or existing tooth structure fractures and detaches from the tooth, there may be a need for me to receive extensive treatment such a root canal treatment, post and build-up, and crowns, which would necessitate a separate charge.

I acknowledge and understand that silver amalgam (if used to restore my teeth) is an acceptable procedure according to the American Dental Association guidelines and, as such, is a treatment modality that is used by my doctor (Dr. Nawabi). The advantages and disadvantages of alternate materials have been explained to me.

(initials)_____

E. **ROOT CANAL TREATMENT (ENDODONTICS)**

The reasons why I need a root canal and the method have been discussed with me. Risks, benefits, and alternative to treatment, as well as the consequences of non-treatment have been discussed and explained to me. I acknowledge and

understand that following the root canal I will also need a cap (crown) over my tooth because my tooth will be brittle and will need protection against fractures.

I acknowledge and understand that the risks involve can include, but are not limited to:

1. Discomfort lasting hours to several days (if needed, medication will be prescribed by the doctor).
2. Swelling of the area near the treated tooth and/or gums or facial swelling which may persist for several days or longer.
3. Trismus (jaw opening restriction)
4. During treatment root canal instruments may break which in the judgment of the dentist be left in the treated root canal and/or bone as part of the filling material, or may require surgery for removal and/or referral for further treatment by an endodontist (root canal specialist).
5. Risk of temporary or permanent numbness in the area of treatment.
6. Perforation of root canal with instruments, which may require more surgery or result in premature loss of tooth or extraction.

If a pulpotomy or an (open and medicate) procedure is performed, I acknowledge and understand that this is not a complete root canal and permanent treatment, and I will need to pay for, and finish final root canal therapy. If I do not follow these instructions to finalize the root canal treatment, I expose myself to the possibility of infection and/or tooth loss.

If the root canal treatment fails, the therapy may have to be redone by an endodontist, root-end surgery may be required or the tooth may have to be extracted.

(initials)_____

F. **CAPS (CROWNS AND/OR BRIDGES)**

I realize that it may not be possible for the doctor to obtain the exact color match of natural teeth with artificial teeth, and that sometimes root canal therapy may be necessary, since pulp exposure may occur during tooth preparation for a crown. I also realize that I will need to keep my new crowns and/or bridges clean, just as I do my natural teeth. This can be done by proper oral hygiene, and periodic cleanings. If I do not maintain my oral health, the result may be decay around and/or underneath the margins of the restoration. This will result in further dental treatment.

(initials)_____

G. **PARTIAL AND/OR COMPLETE DENTURES**

As a very important part of successfully and properly maintaining my prosthetic appliance, I must schedule and keep follow-up appointments. Sore spots should be examined by the doctor.

Furthermore, I understand that I may possibly never be able to wear dentures to my liking, which may be due to bone loss or other factors of complications. I also realize that for the dentures to be properly fitted I may require surgery, including, but not limited to implants, bone recontouring, or bone (tori) removal, etc.

I fully understand, through the explanations that have been provided to me by the doctor and/or staff, the problems that may result in the wearing of dentures. These, include, but are not limited to relining, possible breakage, soreness, and/or looseness due to change in tissue.

(initials)_____

H. **CHILD DENTISTRY (PEDODONTICS)**

I am fully aware that the following procedures are accepted in the dental profession and are used by the doctor:

a.) POSITIVE REINFORCEMENT – Use of praise, compliments, token objects or toys, pats and/or hugs to reward desirable behavior of a child.

b.) VOICE CONTROL – Changing tone and/or volume of doctors/staff member(s) voice(s) to gain attention of disruptive child.

c.) PHYSICAL RESTRAINT – Use of a special device, known as a "papoose board" and/or the use of the doctor's and/or assistant's hands or arms to restrain the head, hands, upper body and/or legs of a disruptive child that may be necessary for the safety of that child.

d.) ORAL SEDATION AND/OR NITROUS OXIDE – Oral medications may help the child relax. Nitrous oxide which may be used to sedate the patient, is a mild gas and is mixed with oxygen and is administered through a mask, placed over the child's nose. The parent/guardian of the child must be available to escort them home after the sedation procedure. They must also observe the patients behavior throughout the day and should contact the dental office with any observations of abnormal and/or out of the ordinary reactions and/or concerns they may have regarding the patient. The parent/guardian must also understand that the child should not drink or eat for 4 hours prior to the appointment

I fully understand that the child may accidentally bite their lip causing injury to occur as a possible result of the use of injection(s) to numb the tooth area for dental procedures.

I fully understand that if the pain and/or numbness do not disappear after a period of time, I may need to return to the dental office for further evaluation.

I fully understand that following the nerve treatment of a "baby tooth" the child may need to return to the dental office for evaluation, and possible extraction.

DENTAL INSURANCE

PAYMENT FOR SERVICES

At least partial reimbursement for dental treatment is often available through various dental insurance benefit plans. However, the treatment fee is your responsibility. You are responsible for any balance your insurance does not pay. Before treatment, read your dental and/or medical insurance policy or check with your insurance representative concerning your coverage. Your dentist's office has its own financial policies, so be sure to discuss payment arrangements prior to your dental appointment and make sure all parties fully understand these arrangements. The office's financial coordinator will be happy to answer any questions you have about fees and payment.
